

PRESS RELEASE

TradeBridge announces significant milestone with financial regulatory approval in France.

19 July 2021: The French office of fintech lender TradeBridge has been given the green light by the country's financial regulator, the ACPR, to expand into the French market. TradeBridge will begin rolling out its services across France from September, once the final remaining conditions are lifted.

"We are delighted to have achieved this significant step towards financial regulatory approval in France. The ACPR process is comprehensive and thorough, so we are very proud to be able to move the business forward with this important accreditation.

The pandemic has accelerated the rate of change in many sectors and created a huge opportunity for entrepreneurial business leaders to seize their moment and drive growth. These leaders are the people we will be talking to about our new approach to financing. Their businesses will be the growth engines of our economic recovery. The success we've enjoyed in other regions has proved that our technology, our partnership and our ability to provide meaningful amounts of working capital, can make a massive difference to business growth."

Stephanie Frackowiak, President, TradeBridge France

TradeBridge uses intelligent profiling, based on dynamic assessments of whole-business data to release substantial working capital to help businesses seize opportunities.

"Everything we do is geared towards meeting the demands of a faster moving world. Our international expansion continues apace, and with this important development, we are now able to deliver a completely new funding experience to the French market.

We have always had a strong French influence at the heart of our enterprise and the whole TradeBridge team are excited to be supporting

Stephanie and her growing team help entrepreneurially minded business leaders in France to seize their opportunity. "

Mark Coxhead, CEO of TradeBridge

COMMUNIQUE DE PRESSE

TradeBridge annonce le lancement de ses activités de financement en France

19 juillet 2021 : Le feu vert a été donné pour lancer l'activité de TradeBridge en France. Agréé en tant que « société de financement » par l'ACPR, l'équipe sera en mesure de financer le besoin des PME et ETI françaises dès la levée des conditions suspensives.

« Dans la continuité du succès de TradeBridge dans d'autres pays, nous sommes ravis d'avoir franchi cette étape cruciale pour l'agrément ACPR en France. La procédure, étant très compréhensif, a été une expérience

riche pour l'ensemble de l'équipe. Nous sommes très fiers de pouvoir exercer prochainement notre activité en France.

De nombreux secteurs d'activités ont été impactés par la pandémie, ce qui a accéléré l'innovation, créant ainsi une opportunité de croissance pour les entreprises prêtes à relever ce défi. La reprise économique se fera grâce à ces sociétés innovantes, et nous voulons accompagner ces porteurs de projets grâce à notre financement de besoins de fonds de roulement.

Notre accompagnement personnalisé, notre technologie, et notre capacité à fournir des montants de crédit significatifs sauront faire la différence pour nos clients. »

Stephanie Frackowiak, Présidente, TradeBridge France

« Everything we do is geared towards meeting the demands of a faster moving world. Our international expansion continues apace, and with this important development, we are now able to deliver a completely new funding experience to the French market.

We have always had a strong French influence at the heart of our enterprise and the whole TradeBridge team are excited to be supporting Stephanie and her growing team to help entrepreneurially-minded business leaders in France to seize their opportunity. »
